## Introduction

Featuring a SATA III 6Gb/s interface and a powerful controller, Transcend's SATA III SSD is the ideal high-speed, lightweight and shockproof replacement for traditional rotating hard drives. With Intelligent Power Shield (IPS) (optional), Transcend's SATA III SSD provides extra protection to data integrity against sudden power failures or blackouts. Using SLC/MLC NAND flash chips, Transcend's SSD ensures superior performance and reliability for industrial-grade applications, such as embedded automation computers, engineering machines, and fanless PCs. In addition, Transcend exclusive SuperMLC technology provides superior reliability and endurance nearly equivalent to SLC NAND flash, yet at a cost-effective price.
